ADE OKERINDE

Product Owner | Product Manager | Customer Data, Analytics & Integrations | CSPO

Fulshear, TX | (346) 218-8294 | addieokerinde@gmail.com | linkedin.com/in/adeoke1

PROFESSIONAL SUMMARY

Product Manager and Product Owner with 8+ years of experience driving AI-enabled process optimization, workflow automation, and data-driven transformation across healthcare, insurance, and operations. Owns technology products at the intersection of business stakeholders, Data Engineering, and Analytics, translating business needs into clear product requirements, user stories, acceptance criteria, and product scope. Proven ability to map end-to-end business processes, define velocity metrics, and implement AI-powered solutions that improve throughput, reduce costs, and increase operational efficiency. Hands-on experience with LLM tools (ChatGPT, Copilot, Claude, Lovable) to design MVPs, automate workflows, and scale AI adoption. Strong background in SQL, Power BI, and cross-functional leadership, partnering with business and engineering teams to deliver measurable outcomes.

Skilled in backlog management and prioritization, roadmap planning, discovery and requirements development, and cross-functional delivery across internal teams, vendors, and technology partners. Experienced with data feeds, integrations, APIs, and pipelines on cloud data platforms that enable personalization, customer engagement, segmentation, reporting, and measurement, with data privacy, consent, and governance built into requirements and solution design. Led the implementation of healthcare BI platforms that centralized enterprise data to identify loss trends and hospitalization risk, improving operational visibility and reporting. Successfully drove claims automation initiatives that reduced processing time by 30% and leveraged AI-enabled process improvements to increase fulfillment rates by 65%.

Recognized for aligning business goals, technology solutions, and product strategy to deliver scalable, high-impact outcomes. Adept at building business cases, defining KPIs, prioritizing product backlogs, leading launch readiness and post-launch validation, maintaining clear product documentation, and delivering solutions that drive operational efficiency and measurable business value.

CORE COMPETENCIES

- Product Ownership & Backlog Management
- Backlog Prioritization & Roadmap Planning
- Business Analysis & Requirements Management
- User Stories, Acceptance Criteria & Product Scope
- Discovery & Requirements Development
- Agile & Scrum Methodologies
- Stakeholder Engagement & Alignment
- Cross-Functional Team Leadership
- Vendor, Agency & Technology Partner Coordination
- Data Feeds, Integrations, APIs & Pipelines
- Customer Data, Personalization & Segmentation
- Data Privacy, Consent & Governance
- Business Intelligence & Analytics
- Data-Driven Decision Making
- Healthcare & Insurance Domain Expertise
- Process Optimization & Automation
- Claims Systems & Workflow Modernization
- AI-Enabled Solution Enablement
- Value Definition & Business Case Development
- Roadmap & Release Planning
- Launch Readiness & Post-Launch Validation
- Risk Identification & Mitigation
- Change Management & Adoption
- Enterprise Solution Delivery
- UAT, QA Coordination & SDLC Lifecycle
- Product Documentation & Status Reporting

TECHNICAL SKILLS

Tools & Platforms: JIRA, Confluence, Azure DevOps, Microsoft 365 (Teams, SharePoint, Excel, Visio), Zoom, Salesforce, SAP, AWS

Data & Reporting: Power BI, Tableau, Excel, SQL, Cloud Data Warehouses, Data Marts

Integrations & Interoperability: REST APIs, HL7, FHIR, X12, Epic Bridges, Data Feeds & Pipelines

AI & Automation: ChatGPT, Microsoft Copilot, Claude, Lovable, RPA

Diagramming & Modeling: Snagit, MS Visio, Lucidchart, Figma, Miro, Greenshot

Testing & QA: UAT, Test Case Development, TFS, API Testing

Methodologies: Agile, Scrum, Waterfall, Kanban, Scrumban

PROFESSIONAL EXPERIENCE

Product Manager | AI Process Optimization | AI Product Owner **12/2021 – Present**

Molina Healthcare – Long Beach, CA

- Led enterprise digital and AI product initiatives across web and mobile platforms, defining product vision, KPIs, and roadmaps while leveraging analytics, A/B testing, and user research to drive adoption, conversion, and measurable business impact.
- Defined and executed AI product strategies spanning personalization, recommendations, fraud, identity, and automation solutions, delivering AI-driven enhancements and improved operational scalability.
- Streamlined claims and compliance automation through AI and RPA initiatives, reducing cycle times by 30%, error rates by 25%, and manual audit effort by 40%, while generating approximately $1.2M in annual cost savings.
- Owned end-to-end product delivery in Agile Scrum environments, authoring 150+ user stories with acceptance criteria and dependencies, facilitating ceremonies, and improving sprint completion to 97% and team velocity by 20%.
- Developed and presented data-driven business cases, ROI models, and investment proposals that secured $500K in funding, improved cost-benefit ratios by 18%, and gained executive approval within two review cycles.
- Partnered closely with clinical, operations, analytics, data science, and engineering teams to identify and prioritize data initiatives that aligned departmental needs with organizational strategy, improving stakeholder alignment and long-term adoption.
- Led complex enterprise data integration initiatives across data marts, warehouses, and cloud platforms, increasing reporting accuracy by 22% and enabling scalable, self-service analytics for business and operational users.
- Served as the primary liaison between business, IT, audit, and external partners, clarifying scope, eliminating 15% of project waste, and reducing change request turnaround time by 30% through improved governance and communication.
- Established ethical and measurable AI adoption frameworks, defining success metrics, monitoring real-world performance, and ensuring fairness, transparency, privacy, and regulatory compliance across AI-powered products.
- Championed data literacy and user-centric analytics experiences by improving UX for data consumers, monitoring product usage and satisfaction, and iterating on features to drive sustained engagement and organizational value.
- Led HR and workforce analytics initiatives by partnering with People Operations to build dashboards tracking attrition, hiring velocity, and employee productivity, reducing turnover by 18% and improving workforce planning accuracy by 25%.
- Drove HR process automation using AI and workflow tools to streamline onboarding, compliance tracking, and performance review cycles, reducing onboarding time by 30% and manual HR workload by 35%.
- Collaborated with HR leadership to implement data-driven talent strategies, leveraging predictive analytics to identify retention risks and improve employee engagement, increasing retention rates by 20% and internal mobility by 15%.
- Led the product strategy and roadmap for integrating Epic EHR with Molina Healthcare's enterprise payer ecosystem, enabling seamless exchange of clinical and administrative data across provider, claims, care management, and member services platforms.
- Partnered with engineering teams to define interoperability capabilities using Epic Bridges, HL7, FHIR, REST APIs, and X12 standards, translating complex business requirements into prioritized product backlogs and actionable user stories.
- Drove cross-functional collaboration among clinicians, operations, compliance, and technology teams to deliver scalable healthcare solutions supporting Medicaid and Medicare Advantage populations.
- Delivered product enhancements that improved claims processing efficiency by 20%, reduced manual workflows by 35%, and increased interface reliability to 99.8%.

Business Analyst / Data Analyst **01/2017 – 12/2021**

Axxess – Dallas, TX

- Owned and evolved the product vision, multi-year roadmap, and prioritized backlog for enterprise healthcare analytics, digital, and AI-enabled products across clinical operations, revenue cycle, and compliance reporting for home health, hospice, palliative, and home care agencies.
- Launched Axxess's enterprise BI reporting function in Tableau, authoring the initial dashboard suite covering clinical operations, revenue cycle, and compliance reporting for internal teams and agency customers.
- Led the end-to-end migration of 120+ Tableau reports to Power BI, driven by rising Tableau licensing costs, owning the business case, license procurement, wave-based rollout, and full Tableau decommissioning.
- Prioritized the migration backlog by business value, report usage, and technical dependencies, and led launch readiness and post-launch validation through UAT, data parity checks, user training, and adoption tracking, reaching 94% user adoption.
- Defined product outcomes and success metrics aligned to enterprise strategy, including clinical quality, billing accuracy, referral conversion, agency revenue growth, and customer experience.
- Translated complex healthcare business needs into clear epics, features, and user stories with acceptance criteria and measurable value, enabling consistent delivery across Agile teams.
- Led cross-functional Agile delivery as Product Owner, facilitating backlog refinement, sprint planning, reviews, and release management to ensure timely, high-quality outcomes.
- Partnered with Data Engineering, BI, Architecture, UX, and Engineering teams to design scalable, cloud-based data platforms, data feeds, dashboards, and self-service analytics solutions for clinical and operational users.
- Drove development of healthcare analytics and BI products spanning clinical operations, revenue cycle management, referral and intake, and CMS quality and compliance reporting.
- Championed data governance, HIPAA-compliant data access, metric standardization, and single-source-of-truth principles to ensure trusted, auditable, and actionable insights for executive and operational users.
- Acted as a trusted advisor to senior leaders, translating strategic objectives into product investments and clearly communicating roadmap progress, risks, and value realization.
- Partnered with HR and leadership teams to design and deliver workforce analytics solutions, enabling visibility into employee performance, retention, and hiring trends, improving decision-making efficiency by 20%.
- Led the implementation of HR reporting dashboards and KPIs (headcount, turnover, time-to-fill), reducing reporting cycle time by 40% and improving data accuracy by 22%.
- Supported HR digital transformation initiatives by translating business needs into analytics and automation solutions, improving onboarding efficiency by 25% and enhancing employee experience metrics by 18%.

EDUCATION

M.Sc., Data Science August 2026

Eastern University – St. Davids, PA

B.Sc., Mathematics May 2004

Worcester State University – Worcester, MA

CERTIFICATIONS

- Certified Scrum Product Owner (CSPO) – Scrum Institute.org February 2026
- Certified Scrum Master – Scrum Institute.org February 2026
- Microsoft Certified: Power BI Data Analyst Associate July 2025
- Tableau Certified Desktop Specialist February 2023
